-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-10 are objected to because of the following informalities: "centring" is misspelled throughout. Claim 1, line 5, "a locking" should be -- the locking --; line 6, "stump" is not common terminology, and "two" should be -- a --. Claim 4, line 3, "gimlet" should be -- twist --. Claim 5, last line, "secant" should be -- normal --. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al 6371789.

Sato et al discloses sheet metal centering feet 13 having stump (catch) 13-1 and piercing means 13-3. The planes of the piercing means are normal to the plane of the elastic tongue having the stump (catch) 13-1 thereon.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al as applied to claim 10 above, and further in view of Asick et al 4762505.

Sato et al substantially discloses the claimed invention except for the connector contacts being connected to a cable. Asick et al discloses the contacts being

connected to a cable, and to form the contacts of Sato et al such that they are adapted to be connected to a cable thus would have been obvious, to allow greater versatility for a particular use.

Claims 1, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asick et al in view of Sato et al.

Asick et al substantially shows the claimed invention, including upper and lower covers 98,80. Asick et al, however, does not disclose piercing means on locking means 136 a,b. Sato et al discloses piercing means 13-3 on locking means, and to provide the locking means of Asick et al with piercing means thus would have been obvious, to prevent inadvertent removal of the locking means.

Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches the gimlet (twist) of 90 degrees, nor the centering and reinforcement strip, in combination with the rest of the subject matter of the independent claim.

The other references cited on Form 892 disclose similar locking means.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F. Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.
